

# Classification Worksheet

## Types of Classification

### MAMMALS

Mammals have hair/fur and breathe air.

Fact: You can find otters in England and they like to hunt at dawn/dusk.

### BIRDS

Lay eggs and have feathers/wings. Not all birds can fly.

Fact:: The largest bird in England is the White Tailed Eagle with a wingspan of around 2m.

### REPTILE

Have dry scaly skin, most lay eggs and are cold blooded.

Fact: The adder is the only venomous snake found in England.

### FISH

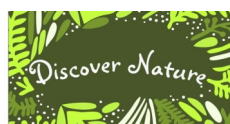

Live in water and have gills so do not breathe air.

Fact: The Basking shark is the 2nd largest species of shark in the world and visits England in the summer months.

### AMPHIBIAN

Have moist skin, can live on land and in water. Will go through a metamorphosis.

Fact: Common toads can produce a toxin which makes them taste yucky to predators.

# Who is what?

Under the pictures write whether you think the animal is:-

- Amphibian

- Reptile

- Bird

- Mammal

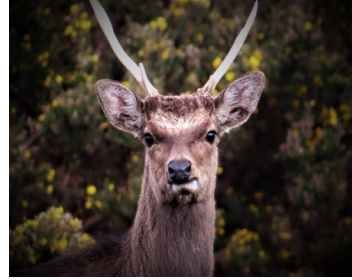

- Fish

# Colouring page

# Animal Factsheet

1. Name an animal which you can find in England: \_\_\_\_\_

2. Is it a mammal, bird, reptile or amphibian? \_\_\_\_\_

3. Draw on the map below where you would find this animal

4. Draw a picture of the animal

5. What food would this animal eat? \_\_\_\_\_

6. Do other animals like to eat it?

\_\_\_\_\_

7. How big can they grow up to? \_\_\_\_\_

8. How long can they live for? \_\_\_\_\_

## Design a home where an animal would like to live

When designing the home think about the following:

Where they sleep

What food they eat

What they drink

Do they like it cold or warm?

# Collective nouns

A collective noun is a word which is used to represent a group of animals e.g. A romp of otters or a herd of deer. See if you can fill in the collective nouns below.

A \_\_\_\_\_ of starlings

An \_\_\_\_\_ of ants

A \_\_\_\_\_ of butterflies

A \_\_\_\_\_ of cows

A \_\_\_\_\_ of crows

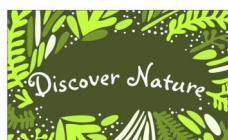

A \_\_\_\_\_ of magpies

An \_\_\_\_\_ of ravens

A \_\_\_\_\_ of sharks

A \_\_\_\_\_ of owls

A \_\_\_\_\_ of snakes

# Memory Quiz!

1. What is a mammal?

---

2. Can you name an animal which is a mammal? \_\_\_\_\_

3. What is a reptile?

---

4. Can you name an animal which is a reptile? \_\_\_\_\_

5. What is a fish?

---

6. Can you name an animal which is a fish? \_\_\_\_\_

7. What is an amphibian?

---

8. Can you name an animal which is an amphibian? \_\_\_\_\_

# Adjectives and Verbs

Adjectives are describing words and verbs are action words. Below you'll see a noun and you'll need to write a sentence about that noun which includes an adjective and a verb. The first one is done for you.

E.g. Snake

The scaly snake slithered away.

1. Robin

---

2. Squirrel

---

3. Fox

---

4. Otter

---

5. Badger

---

6. Lizard

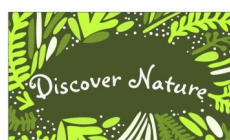

---

7. Snake

---

8. Frog

---

## DID YOU KNOW?

- Slow worms are a legless lizard
- Some lizards can make their tail fall off if a predator is trying to get them– giving them a chance to escape!
- Bats in England love to eat insects and some can eat thousands in a night.
- Badgers are really good diggers and live in holes underground called setts.
- Hedgehogs can walk over a mile in one night.
- The ladybird spider is a very rare spider. The boy spider has the colours of a ladybird.
- Dragonflies can shoot their jaw out in order to catch their prey.
- Snakes have no eyelids! They are unable to blink. They also don't chew their food, but will swallow it whole.
- Otters have long whiskers on their face which help them to sense prey in murky waters.
